PROFESSIONAL SUMMARY

RHCSA-certified B.Tech CSE graduate (8.14 CGPA, First Class with Distinction, department topper) with hands-on experience in Linux administration, AWS, Terraform (Infrastructure as Code), Ansible, Docker and Jenkins from a Cloud & DevOps internship. Skilled at configuring, automating and troubleshooting RHEL/Ubuntu systems from the Linux CLI. Seeking junior Linux administrator, DevOps, cloud support or systems engineer roles.

SKILLS

Linux Administration: RHEL & Ubuntu, user/group management, file permissions and access control, systemd services, TCP/IP networking, shell scripting (Bash), Linux CLI, troubleshooting

Cloud & Infrastructure: AWS (EC2, S3, security groups; console & CLI), Terraform (Infrastructure as Code), Google Cloud fundamentals

DevOps & Automation: Ansible (playbooks, roles, Navigator, Jinja2), Docker & Docker Compose, Nginx, Jenkins (CI/CD), Git/GitHub, Kubernetes fundamentals, MERN stack deployment

Programming & Data: Python, Java, C, JavaScript, SQL, HTML5/CSS3, Excel

EXPERIENCE

Cloud & DevOps Intern | IPSR Solutions Ltd, Kottayam *Feb 2026 – Sep 2026*

- Configured RHEL and Ubuntu servers to RHCSA standard: users and groups, file permissions, networking and systemd services.
- Automated Linux server setup with Ansible playbooks and roles (Navigator, Jinja2), covering packages, Apache and SSH authentication.
- Replicated the full environment in a second AWS region through Git-based deployment, demonstrating Infrastructure as Code.
- Provisioned AWS resources (EC2, S3, security groups) via console and CLI, and wrote Terraform scripts to create them consistently across environments.
- Containerized web applications with Docker and Nginx using a 5-step Dockerfile build pipeline, port mapping and firewall rules.
- Deployed a 3-container Django + Nginx + MariaDB stack with Docker Compose, including reverse proxy, service dependencies and environment variables.
- Implemented Jenkins CI/CD pipelines for automated build and deployment; managed parallel Git branches and resolved merge conflicts.
- Hosted 3 application stacks (Flask, Java, MERN) on local servers, running services simultaneously across multiple ports.

PROJECTS

Automated WordPress Hosting on AWS | Ansible, AWS EC2, Nginx, MariaDB, PHP-FPM, Certbot

- Engineered an Ansible pipeline that provisions a full LEMP stack on AWS EC2, reducing manual server configuration to a single playbook run.
- Enabled secure SFTP access, custom domain DNS mapping and Certbot HTTPS for a fully automated WordPress deployment.

Medical Image Segmentation & Encryption | Python

- Developed a Python pipeline for medical image segmentation with a 97% Dice Coefficient, cutting radiologist labeling time by 70% at under 200 ms per image.
- Protected DICOM transmission with SHA-256 integrity hashing and encryption aligned to HIPAA safeguards.

CERTIFICATIONS

RHCSA (Red Hat Certified System Administrator) – Red Hat | Verify on Credly — Aug 2026

Learning Kubernetes – Kim Schlesinger, LinkedIn Learning — Jul 2026

AWS Training Certificate – IPSR Solutions Ltd — Jun 2026

Google Cloud Fundamentals: Core Infrastructure – Coursera — Feb 2026

EDUCATION

B.Tech, Computer Science and Engineering | Lourdes Matha College of Science and Technology *Nov 2021 – Apr 2025*

CGPA 8.14 / 10.0 · First Class with Distinction · Department topper

Higher Secondary (Biology Science) | St. Joseph's GHSS, Kottayam | 97.25% *Jun 2019 – Mar 2021*

ACHIEVEMENTS

- **Final Year Department Topper** – Rakesh U N Memorial Ever Rolling Trophy, B.Tech CSE (March 2025).
- **KSUM IDEAFEST Winner** – Selected for funding among 500+ startups; ₹60,000 grant for an assistive travel solution for the visually impaired.
